HOW TO USE THIS CATALOGUE

Products are grouped into five segments and 25 product families by application. Product names and CAS numbers or applicable product identifiers are provided for identification purposes. Grade, specification, availability and lead time are confirmed for each enquiry. Separate brochures are available for each product range. Some products appear in more than one brochure where they serve more than one industry. The dedicated brochures group products by application, so their category totals differ from the family counts in this portfolio.

QUALITY & EXPORT EXECUTION

HCPL coordinates specification alignment, qualified sourcing or partner manufacturing, batch documentation and export shipments. A Certificate of Analysis accompanies every consignment. All export consignments are packed in UN-specification packaging.
